Horowitz, to educate people around the world on matters of extreme public importance. DNA: Pirates of the Sacred Spiral

Description: Based on the latest science, this monumental book considers both uses and abuses of DNA – “The Sacred Spiral.” Stunning evidence compiled herein proves DNA is nature's bioacoustic and electromagnetic (that is, “spiritual”) energy receiver, signal transformer, and quantum sound and light transmitter. In other words, the bioenergetics of genetics precipitates life. These scientific revelations bring expanded spiritual meaning to life, physical embodiment, and even evolution. Yet, leading genetic industrialists prefer to keep these uplifting and freeing truths secret. The infamous untrustworthy “Human Genome Pirates” operate covertly, controlling genetic patents, spin-off technologies, and public information dissemination. With the world's most powerful banking and pharmaceutical cartel behind them, they now control civilization's destiny. The greatest risk of manipulation and threatened extinction is at hand. As humanity teeters on the brink of unprecedented DNA-mediated, spiritual ascendance or complete enslavement if not extinction, argues award winning author and public health expert, Dr. Leonard Horowitz, this riveting prose provides critical direction for humanity's physical spiritual salvation. This book offers revolutionary new views of emerging genetic research consistent with largely secreted science and sacred spiritual knowledge. Chapters incorporated this metaphysical science non-fiction thriller include discussions of electro-genetics, quantum physics, bioholography, human consciousness, and even spiritual dynamics, to accomplish an urgent mission: awaken humanity to the highest levels of risk awareness and accountability for our planet's destiny.
